## HDL Quality, Global Sharing

The head quarter of HDL Group is located in Guangzhou, and its branch and subordinate agency extend to the whole country. HDL set up branches in Germany and Norway. Its products extend to all over the world.

The strong selling network of HDL has already covered the whole world. Today HDL has owned more than 200 dealers and more than 1000 installers, such as France, Germany, Italy, Norway, Greece, Ireland, Poland, Ukraine, Russia, Bulgaria, Australia, India, Malaysia, Indonesia, Singapore, Korea, Egypt, Iran, Israel, Pakistan, South Africa, UAE, Brazil...

Everyday, there are many engineered projects which HDL products are applied. The product of HDL has already walked around every corner of the world.

# About us

HDL is a High Technology Enterprise which has more than 26 years experience in this industry.

It is engaged in professional networking stage lighting control system and Home Automation control system, for products research and develop, manufacture and sale. In recent 10 years, HDL has devoted itself to explore the field of Home Automation, and started the Chinese independent Home automation brand in China. Though combining independent research with international cooperation and aborting advanced life ideal, the market share of HDL expands unceasingly, and the products are spread across the world.

In recent years, the Home Automation products of HDL have gained various awards from domestic and overseas. In 2008, HDL prize award "Top 10 brand of Chinese intelligent lighting system", "The 2010 Asian Games Guangdong electrical building recommended brand". In 2009, the products of HDL successfully candidate CEA outstanding brand award. The building intelligent control system of HDL got prize award 2009 intelligent building high-quality products, which was given by Chinese construction association intelligent building professional committee. The chairman Liang Guoqin was given the award of "Outstanding (products) desirer"; In 2010, HDL gain the award of "Annual intelligent building high-quality products" and "Annual intelligent building industrial product branch", which is given by Chinese construction association intelligent building professional committee and domestic professional media Qian jia Web select 2010 as the ten Home Automation brands as well as ten intelligent lighting brand.

HDL has owned a high quality technical team, concentrate on research and develop of each product, concentrate on sales and service at every time, because of this dedicated spirit, HDL has gain approval from domestic and foreign organization. HDL has become a unit of the standing committee of Chinese construction association intelligent building professional committee, the member of Chinese video industry association digital home industrial alliance, the AAA quality and safety enterprise of national engineering quality safety supervision and administration committee. In the meanwhile, HDL is also the first Chinese enterprise joining in the international KNX association.

Facing the drastic competition, HDL will develop together with the technology; people oriented, and still struggle for achieving to revitalize ethical intelligent control industry.

High-tech enterprise conformation certificate

National engineering quality safety supervision and administration committee AAA quality security enterprise

Sixth place in the 2010 Intelligent Lighting Brand

Ninth place in the 2010 Home Automation brand

Software enterprise confirmation certificate

"World expo engineering services" honorary certificate

"The Asian Games engineering services" honorary certificate

2010 Asian Games in Guangdong Province, recommended brand of building electrical

Liang Guoqin president won the "2008 Ten Outstanding Designer of intelligent building industry (Product)" title

2009 famous brand products in intelligent building industry

China Construction Industry Association, Standing Committee of Intelligent Building

Unit Top ten most competitive brands

Member of European Installation Bus standard KNX Association

ISO 9001:2008 authentication enterprise

HDL - BUS construction intelligent control system won the 2010 annual intelligent building high-quality products

Energy-saving Recommended Brand

In the hot summer, you are driving a car, in the meanwhile sending a message to make the air-conditioner operated in advance, and prepare your favourite background music.

In the lazy winter, you, lying on the sofa in the dining room, can make a cup of coffee through a controller. There is no need to turn off the lights of other rooms just only use a bottom of a controller.

The nervous security is no longer in the garden. If there is a gas leakage, fire, broken-in, the belt will alarm to the service center. Even if you are at work, you will not be afraid. The smart home system will notice you by sending a message.

Perhaps you consider it is amazing, but in fact, it comes true. Because of the smart home, it makes your life comfortable, safe, intelligent and energy saving.

HDL smart home system is based on humanity, combining high-technology and comfortable living standard perfectly. HDL creates a newly-started smart home system.

Let us walk into intelligent life each day, feel the Home Automation of HDL tighter... ..

**1 Touch screen**

Touch screen can provide facility and fast control mode. By using the icon which can be distinguished easily, we can enjoy the control of lighting, curtain, and background music, air-condition, security, sound, floor heating, and scene.

**2 Security**

The profession high quality DVR and DVS image detective alarm platform are integrated to the system, at the same time, HDL security system module controller is inserted traditional IR beam, glass break, door iron, motion sensor, RFID identification, and intimidation alarm, and combine the advanced means of the unique smart audio, flashing lights, message platform, image store.

**3 Lighting**

Provide a warm and comfortable lighting environment for repast, receive a visitor, movie and entertainment. It can individually control and scene control by using terminal control equipments of strong panel, remote controller, mobile touch screen and Iphone to improve used1 life of lamps and save energy.

**4 Household music system**

We can individual enjoy various music at home, which have sound source of FM reception, local MP3, HDL background music also has voice prompt senior function, such as go home/leave home voice prompt, security voice prompt, agenda voice prompt. All these make the background music be an essential member of home network system.

**5 Monitoring camera device**

It can set up mobile monitoring area reasonably through settings image monitor system in household each position to make image monitor system can hold the post of many security work, the image of illegal infiltration can be timely record to system, user can see visitors from internet or understand houses overall safety situation.

**6 Power management**

HDL power management system can timely record electricity load of higher power equipment at home. The system can provide customers for energy consumption reference through analyzing whom is the power-hungry businesses, electricity rates, time ratio in a chat way.

**7 Temperature controller**

The link between intelligent temperature controller and intelligent control system can automatically generate zoning and scene mode, maximum save energy and provide a comfortable environment temperature.

**8 Internet access and control**

HDL home network system configure remote connections of gateways, through that gateway, you can use your favorite mobile control terminals to control and monitoring the whole household status, such as the situation of video, doors and windows, coal gas, water valve, appliance, air-condition.

**9 Telephone**

Systems use simple and quick message control mode. No matter in any one corner of the world, HDL message system can provide you for facility and quick control channel, such as security open/close, open or close appliances, air-condition, floor heating thermostat, coal gas, water valve and lighting system.

**10 Infrared displacement sensing monitoring**

Motion sensor can detect human mobile is installed in indoor. It has owned detective logic of ambient brightness, temperature, stem node point as well as security logic function.

**11 Vehicle tracking**

The system can automatically distinguish vehicles, open garage door, open related lighting system and security system through RFID.

**12 Irrigation**

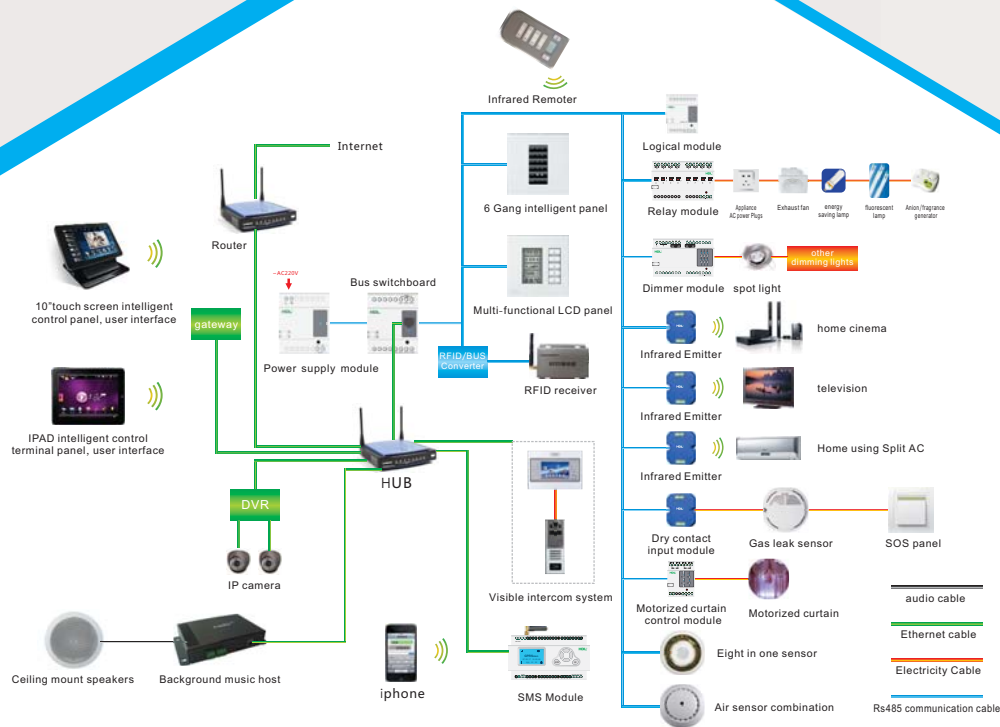

The system can decide whether opening irrigating system according to schedule and soil temperature.

**13 Pool and spa**

The system can control the water temperature and safety cover swimming pool, filter, solar energy according to your need.

# Smart home solutions

## Comfortable life, realize easily

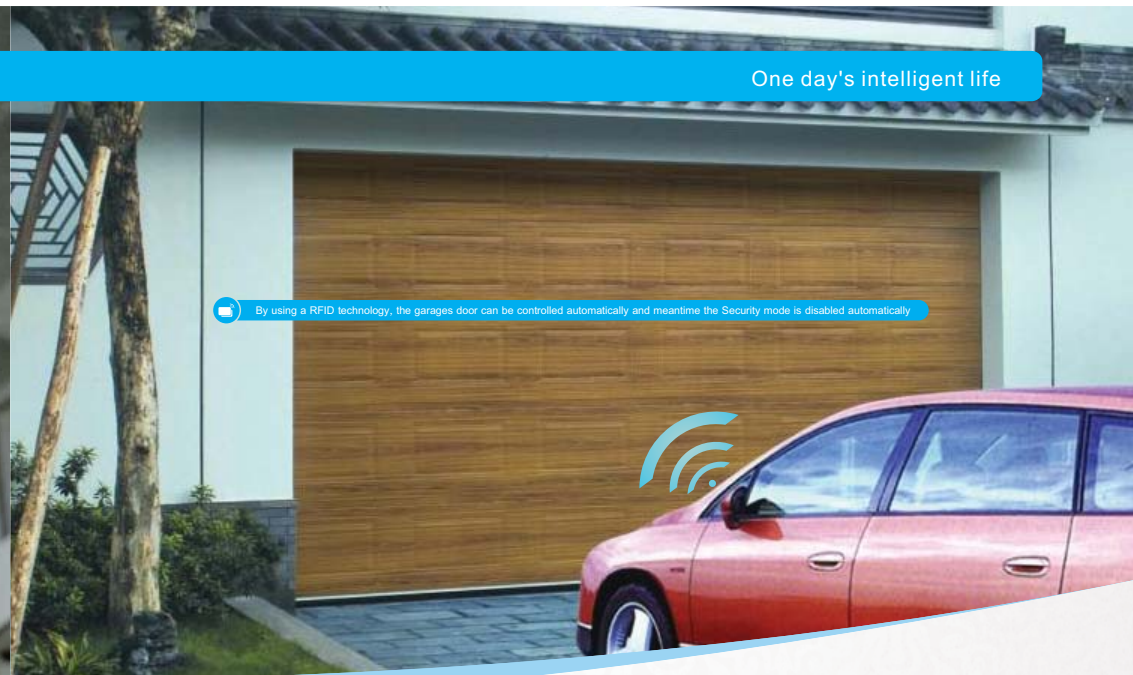

HDL smart home system adopts the communication of industry field bus. Every single physical bus can handle 64 equipments; this single physical bus was named subnet. A large network is consisting of each subnet of physical bus, by using the Ethernet Gateway and HUB. HDL intelligent system can accommodate up to 60,000 equipments.

It is a distributed system, central Host is not needed, according to the real application, it is very easy to configure different product which has different functionality in HDL Smart Home System. It is unnecessary to increase too much additional wiring for increasing or decreasing the function of system, we can realize easily just increasing corresponding function module as well as doing simple settings.

Compared with ordinary system, HDL smart home system not only have the traditional function of living, but also providing comfortable and safe, high quality and pleasant family living space; it can make the home system from a passive static structure turn into a tool which has dynamic wisdom, provide a full range of information exchange capabilities, help families to keep smooth exchange of information with the outside, optimize the way people living, help people arrange a time effectively, enhance the security of home life, and save money for a variety of energy cost.

Sending messages successfully, Back Home mode is activated

By using a RFID technology, the garages door can be controlled automatically and meantime the Security mode is disabled automatically

18 00 Remote control on the way of you back home

After one-day job, you can just send a message to open your house's equipment, so that you can have a good time in this comfortable environment. For example, turn on the AC at a setting temp in a hot summer day; this makes you feel good when you back home.

GPRS/SMS controller

Garage automation, it can be realized by using RFID 18 30

The owner who driving back home can easily have the garage's door opened, lights are turned on automatically, by using the RFID identity technology, the system will be disarmed automatically, the garage doors will be opened automatically and garage lighting will be opened. The channel light will be opened, too.

The room is tonal along with the mood and set, harmonious and natural

Background music can make you feel comfortable and infection mind

Through ouch screen, choose the scene mode

Select "Dinner" mode, downy lamplight, can increase more romantic atmosphere

User Interface of 7"touch screen intelligent control panel

Modern series, multi-function intelligent panel

18 35 Coming home and personalized scenes

Open the door , each family member has its own home mode through the identification, different period has different home scene. Such as light brightness, adjust color, the background music or open like TV program. Maybe you tired of monotonous life, can also according to the mood set up different home mode, life filled with fresh element.

Dining-room, romantic experience 19 00

Your family prepares a good dinner for you, only need to choose "dining mode", downy Lamplight will automatically open. Drinking wine with the beloved person, and begin to enjoy the dinner.

- Cinema mode activated, curtain close automatically, lamplight slowly darken
- Press the keys to enter into the air conditioning control interface, choose appropriate temperature
- Humanization, different demand, can choose different mode
- Press the buttons, to start cinema mode, wonderful film
- Control the Home Appliance through Touch Screen easily
- Choose party mode to have fun with friends

- Display paused, to indicate the alarming message. The light inferior flashing and the alarming appear
- When a call comes, voice and capture both paused
- The camera monitor is working in real-time and displays the capture
- High Humidity in the room and environment is changed automatically

10" touch screen intelligent control terminals

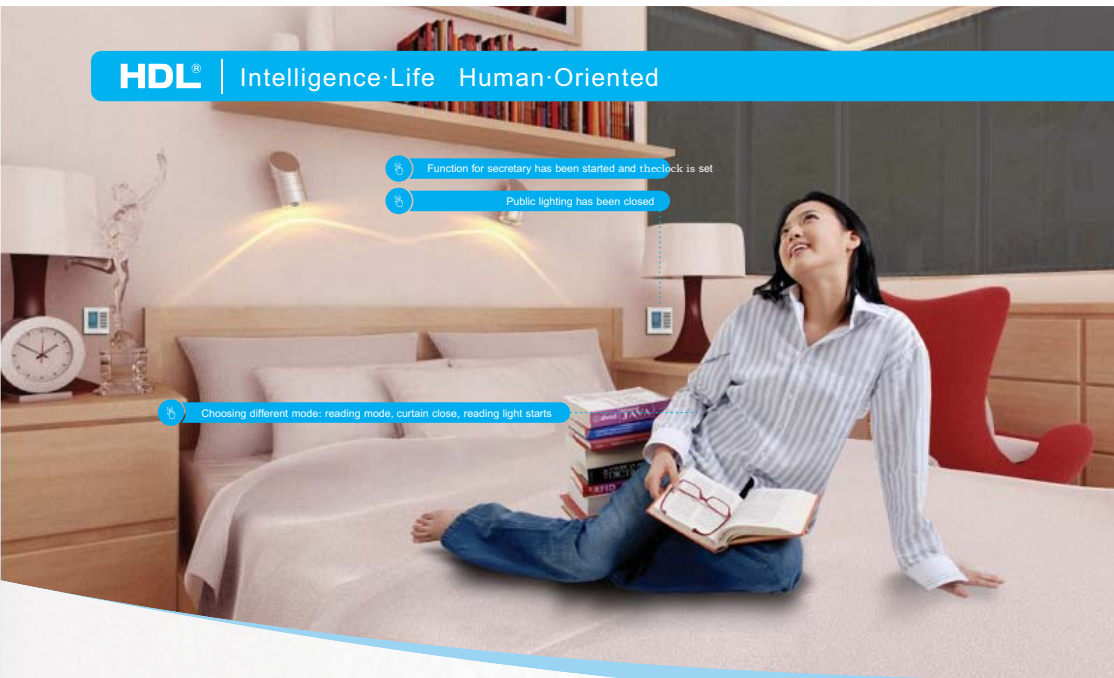

I-life intelligent control software

Dining room, it's designed by you **20 00**

After meals, entering the sitting room, choosing the "Cinema mode", with darken light, meanwhile TV, DVD will open automatically, you can appreciate international film and enjoy spare time.

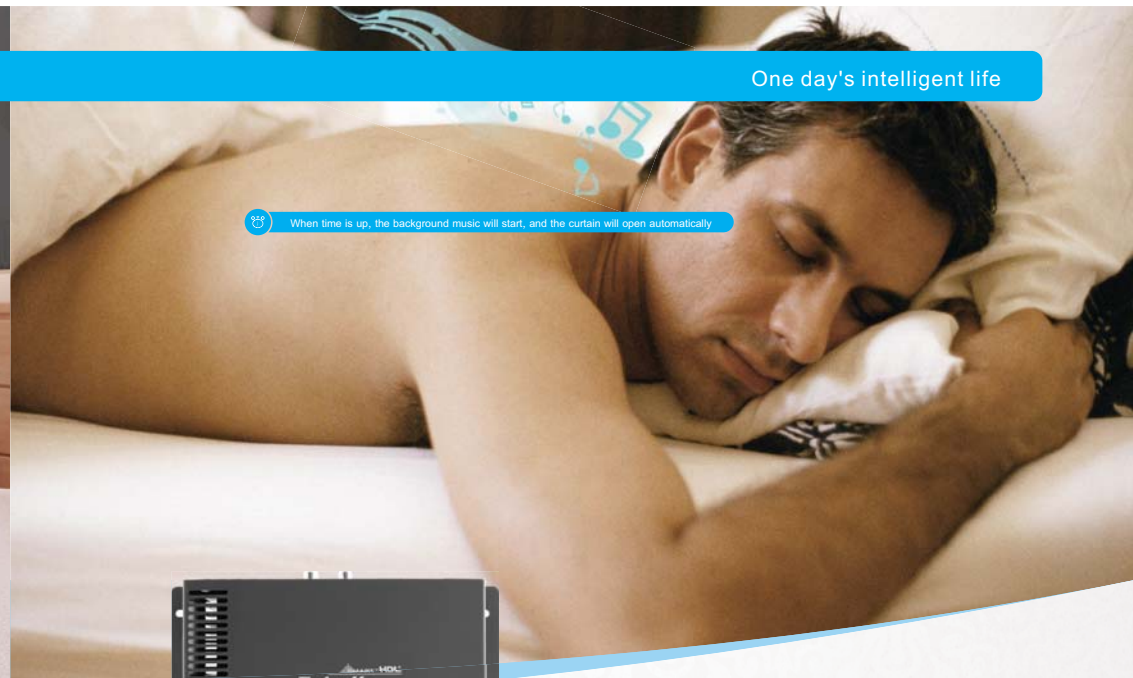

The time you stay at home is abundant and wonderful. Perhaps you stay with your family as usual, date with your friends, have a nap when you are tired, enjoy your sweet time with your lover..... According to various demands, you can choose different modes. Only a key can fulfill what you need: Guest, Party, Meal, Rest, TV, Cinema, Closed, Multimedia, safety.....

Function for secretary has been started and the lock is set

Public lighting has been closed

Choosing different mode: reading mode, curtain close, reading light starts

When time is up, the background music will start, and the curtain will open automatically

23 00 Bed-room, relax and go to sleep

The sky is getting dark. When you go back to bed-room and read some magazine before going to sleep, you can choose "reading mode". The curtain will close and the lamp for reading will be turned on. After reading, you would like to sleep. Press "Public controlling", and the light in public space will all be closed. It is not necessary for you to turn them off one by one, and you just need to enjoy a nice dream...

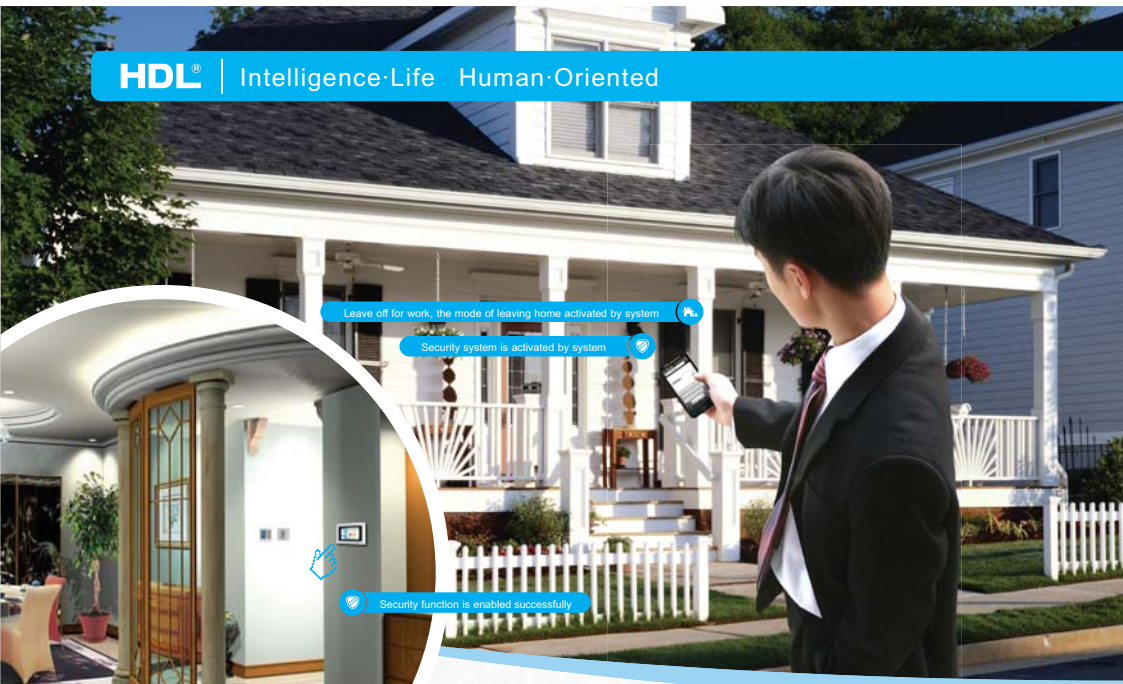

When you get up at night, only pressing "Light Mode", the light will be turned on. And your vision will be available at the soft lighting.

Z-Audio- Background Music Server

Bed-room, a blank-new day 07 00

The pre-set function of secretary starts, the background music will be played. Then there is a piece of get-up music. The curtain will be opened gradually. The sun-shine goes through the room, and a new day starts.

Leave off for work, the mode of leaving home activated by system

Security system is activated by system

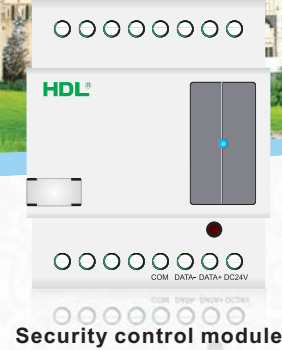

Security function is enabled successfully

08 00 when leaving off for work, security system protect everything

Having had the breakfast and ready to go to work, you can press the leaving mode before go outside, then all the lights will close automatically, electrical appliances enter the standby mode or shutdown power directly, curtain will close automatically and start safe mode later.

Holiday mode starts and you can have more fun and sense of safety

Security control module

### Travel and vacation

If you are on your trip, you can choose "Holiday mode". HDL smart system monitors the illegal broken-in. And the system will keep light, watering on.

When there are emergency situations, the olds and children will ask for help in time, and the helping words infenor will start

Helping message has been sent

Indoor alarm voice rings, messages are sent successfully

The status of the coal gas induction states, induct the happening of the fire, then inform the security room as well as the given mobile phone immediately

## Urgent SOS

The washing room will keep lights on by induction. When you leave, it will close automatically.

Helping capture is set in washing room. If you are in need, you can press and the music system will ask for help by message and notice your family members. When they get the message, they will take measure at once.

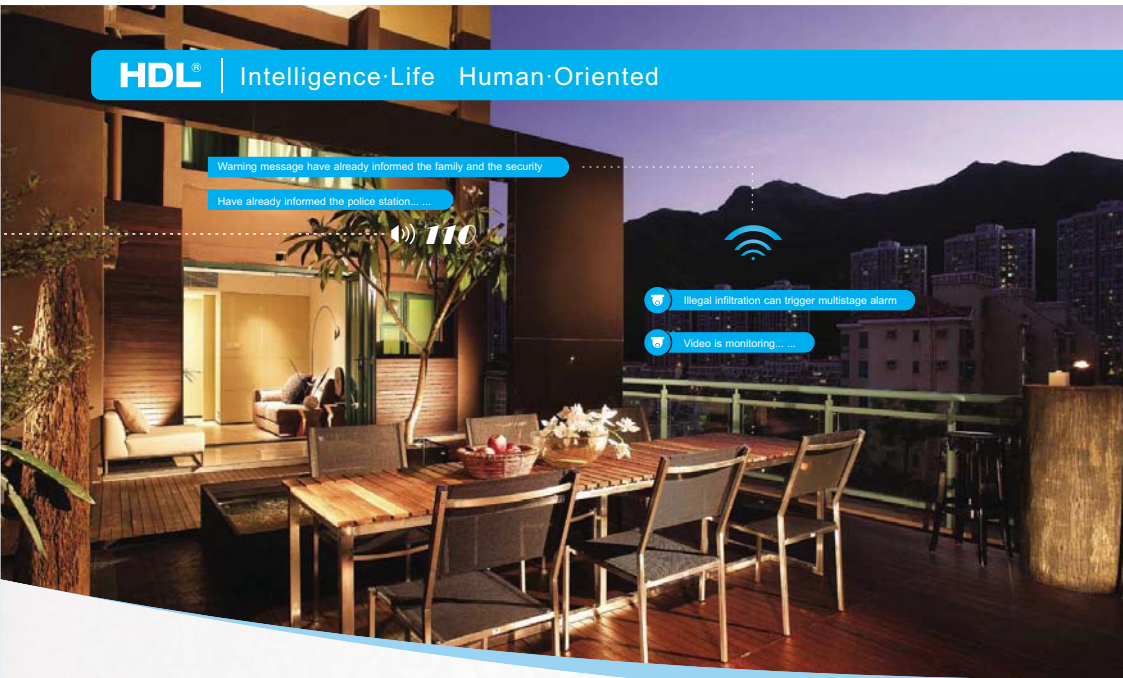

Multifunction Sensor

## Timely monitoring

The gas pipe outlet of the kitchen is installed combustible gas inducted probe, when the gas leakage happened, the system will send the voice prompt and send warning message to the family in order to remind them to handle it well.

When the glass windows are broken, the system will raise the alarm automatically.

Through catching the video, you can timely monitoring the situation of safety and make the mobile deduction.

## Multistage alarm

Through catching and tracking the video, the alarm system can realize multistage alarm. If there is an intruder entering into fence, which triggers the first alarm, he will be given voice warning. If the intruder invades to the courtyard, which triggers the second alarm, he will be given bell alarm. Invading the door and window will trigger the third alarm so that the system will make the remote alarm to owner or send message to the mobile phone of the owners.

## Intimidation alarm

It can provide families for making mute alarm when they suffer the duress of the intruder and it can send out the SOS by means of sending messages.

Company 12 30

At lunch break, the owner can control the home electric equipment through using messages, websever, lpad/lphone, mobile phone and so on. The owner can also timely monitoring the situation of home security through using remote camera to check the home situation.

## Intelligent living room solution

- 1-HD TV, support RS232 agreement and infrared control
- 2-Stream media set-top box, support DTV, high definition streaming media, infrared control and network remote control
- 3-Helix server, support high definition movie, picture, music, network remote control
- 4-Lighting and dimmer scene, support LED lamps dimmer
- 5-A variety of sensor, motion sensor, humidity, illumination, air quality, coal gas, carbon dioxide
- 6-Radio telephone and data transmission
- 7-Door contact, glass break
- 8-Background music, support voice prompt dialogue, alarm, schedule
- 9-Controller into the wall, support as many as seven control page, four basic lighting, curtain, infrared code page, air conditioning page, background music page, geothermal page
- 10-Mobile multimedia control terminals, control all the equipments within the household related

- 11-Air-condition control, support traditional IR agreement, BacNet agreement, RS485/RS232 agreement, Lonworks agreement
- 12-Geothermal control, support electrical warming geothermal, plumbing geothermal, oil warm geothermal
- 13-Electrical sunshade, curtain, venetian blind, support IR control, support electrical machine control
- 14-Fingerprint/password door lock, RFID system, support RS232 agreement, support TCP/IP agreement
- 15-Figure IP visual intercom, support video phone which can communicate with every family, leaving message, take photos as a memento, messages of a housing estate, scene
- 16-LED color render, decoration ceiling, television walls, pitch, dining room
- 17-Elevator control, support RS485, RS232, TCP/IP agreement, slem note point
- 18-Electrical projector lifter
- 19-Electrical projection screen
- 20-Large screen projector

## Smart bedroom solution

- 1-HD TV
- 2-Stream media set-top box
- 3-Lighting and dimmer scene
- 4-Multifunctional sensor
- 5-Radio telephone and data transmission
- 6-Background music
- 7-Mobile multimedia control terminals

- 8-Controller into the wall
- 9-Air-condition control
- 10-Floor Heating
- 11-Electrical sunshade and curtain
- 12-Door contact, glass break
- 13-Figure IP visual intercom
- 14-LED color render

Smart bathroom solution

- 1-Intelligent Jacuzzi, support RS232/RS485 agreement
- 2-Geothermal control and heated towel rack
- 3-Defogger and warmer
- 4-Bathroom waterproof phone
- 5-Order controlling intelligent sit implement
- 6-Cozy battery candle
- 7-Warm water tepid system
- 8-Waterproof controller
- 9-Mirror TV
- 10-Stream media set-top box
- 11-Lighting and dimmer scene
- 12-Background music
- 13-Wall Mount
- 14-Air-condition control
- 15-LED color render, decorate underwater, tap
- 16-Looked up information display system, support weather forecast, clock, agenda remind
- 17-Panic butthom

Smart kitchen solution

- 1-Intelligent kitchen electrical equipment
- 2-Kitchen TV
- 3-Digta IP visual intercom
- 4-Radio telephone and data transmission
- 5-Background music
- 6-LED lighting
- 7-Controllable power socket
- 8-Inductive trash can
- 9-Heat smoke sensor
- 10-Gas leak induction and control
- 11-Indoor conduit leakage induction and control
- 12-Air-condition control
- 13-Exhaust system
- 14-Mobile inducted control

Smart assembly hall

- 1-Anionic air fresh machine
- 2-Radio telephone and data transmission
- 3-Controllable power socket
- 4-Electrical projector lifter
- 5-Electric projection screen
- 6-Large screen projector
- 7-Stream media set-top box

- 8-Lighting and dimmer scene
- 9-Multifunctional sensor
- 10-Background music
- 11-Controller into the wall
- 12-Air-condition control
- 13-Geothermal control

Smart dining room solution

- 1-HD TV
- 2-Stream media set-top box
- 3-Art integrated audio
- 4-Anionic air fresh machine
- 5-Lighting and dimmer scene
- 6-LED decorative lighting
- 7-Air-condition control

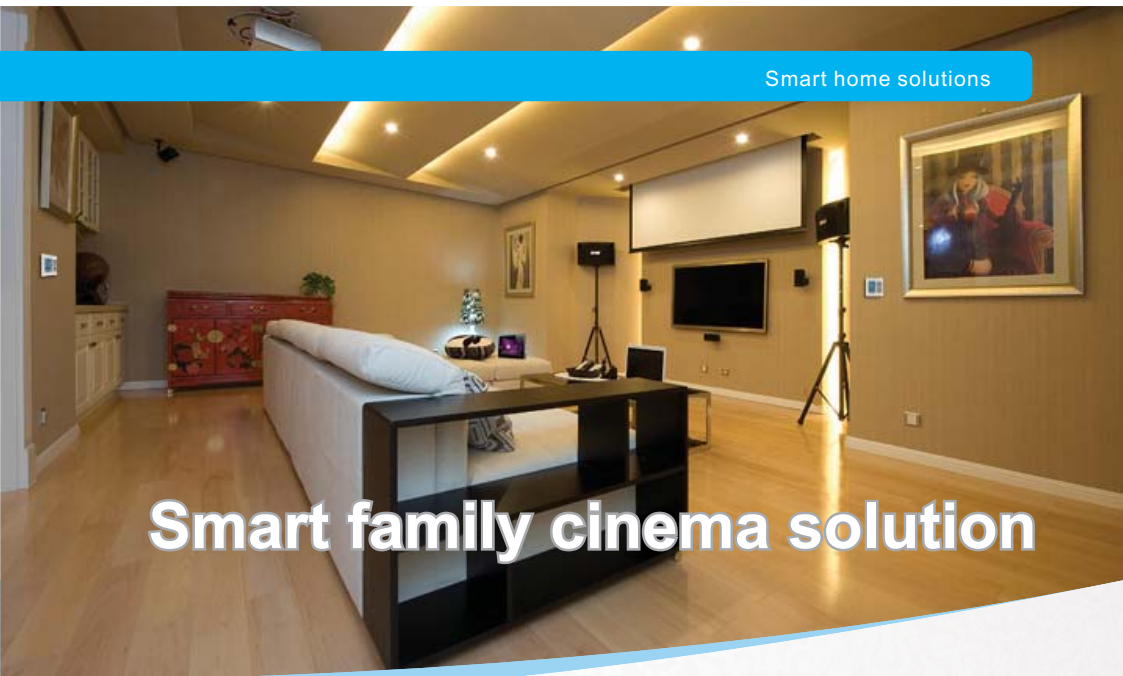

- 8-Geothermal control
- 9-Radio telephone and data transmission
- 10-Background music
- 11-Controllable power socket
- 12-Wall Mount
- 13-Motion sensor

## Smart SOHO solution

- 1-HD TV
- 2-Stream media set-top box
- 3-Lighting and dimmer scene
- 4-LED lighting
- 5-Radio telephone and data transmission
- 6-Background music
- 7-Digital IP visual intercom

- 8-Controllable power socket
- 9-Air-condition control
- 10-Floor Heating
- 11-Anionic air fresh machine
- 12-Wall Mount
- 13-Motion sensor

## Smart family cinema solution

- 1-LED galaxy decoration
- 2-Lighting and dimmer scene
- 3-Motorized projector
- 4-Electric movie screen
- 5-Stream media set-top box
- 6-High quality DLP projector

- 7-Mobile multimedia control terminals
- 8-Professional audio system
- 9-Inflatable deck chair
- 10-Acoustic panel and carpet
- 11-Sonic lasers
- 12-Anionic air fresh machine

smart girl's  
activity room solution

- 1-HD TV
- 2-Stream media set-top box
- 3-LED decoration lighting
- 4-Lighting and dimmer scene
- 5-Controller into the wall
- 6-CCTV pickup monitoring
- 7-Radio telephone and data transmission

- 8-Background music
- 9-Scene floor
- 10-Controllable power socket
- 11-Air-condition control
- 12-Geothermal control
- 13-Digital phone frame
- 14-Anionic air fresh machine

smart boy's  
activity room solution

- 1-HD TV
- 2-Stream media set-top box
- 3-Karaoke system
- 4-Game activity area
- 5-LED decoration lighting
- 6-Lighting and dimmer scene
- 7-Wall Mount
- 8-CCTV pickup monitoring

- 9-Radio telephone and data transmission
- 10-Background music
- 11-Scene floor
- 12-Controllable power socket
- 13-Air-condition control
- 14-Floor Heating
- 15-Digital phone frame
- 16-Anionic air fresh machine

smart fitness  
and SPA room solution

- 1-Intelligent fitness equipment
- 2-Intelligent Jacuzzi
- 3-Massage chair
- 4-Radio telephone and data transmission
- 5-Background music
- 6-Mirror dehumidifiers
- 7-Floor Heating

- 8-Anionic air fresh machine
- 9-Lighting and dimmer scene
- 10-Controller into the wall
- 11-Mirror TV
- 12-Underwater LED lighting
- 13-Intelligent sauna temperature control
- 14-Heating towel rack

smart outdoor solution

- 1-Garden speaker
- 2-CCTV camera
- 3-DVR/DVS
- 4-Pool alarm device
- 5-Bancoly speaker
- 6-Swimming pool temperature control
- 7-UV Rays Mount

- 8-Microwave sensor
- 9-Perimeter infrared bijection
- 10-Underwater LED light
- 11-Fountain control
- 12-Outdoor annunciator
- 13-Automatic garage system

## Guangzhou Asian Games Village, Technical Officer

Guangzhou Asian Technological Officer Village HDL intelligent home system is an opening system, which can connect safe system, Fire controlling system and telecom system, enlarging and matching up to each other.

The controlling ways are various. Its media function is powerful. Users can set and classify the electronic album, gallery, music base and so on by software, which can build family historical video museum. Abundant entertaining function can bring shining lighting to people, feeling what they never have. Clever and honest electronic steward, it can set different life modes according to the living habits of users, arranging comfortable live.

## The Curio Garden Shenzhen

The curio garden Shenzhen, named as "work of nature famous house of Asia", located in Shekoudong, zhenhai district. It's the throat position of western entrance of Shenzhen. In accordance to the design of the city, the bottom works as Parking lot. High-rise and multi-layer residential are all above the platform. It opens horizons of coastline and let the beautiful external environment permeates to resident houses. Its whole image is novel and lively. HDL smart home system is chosen for villa. From Door control, safe control and outdoors lighting to interior, it controls gatheringly.

The curio garden Shenzhen is creative, novel and fashion. Inferior decorating with HDL various bottom, touching screen and panel makes the living-room beautiful and elegant. You can set it in porch, living-room, bathroom, dining room and bed-room. No matter it is modern or conventional; it indicates the unique taste of users.

## Lugang-Future City Intelligent Deluxe Apartment

lugang-future city smart deluxe apartment is located in north tangshan, west youyi road. it covers 571.....lugang-future citysmart deluxe apartment is ranked as the model project of world bank/global environment fund "china supply revolution and saving".

lugang-future city smart deluxe apartment is the first intelligent apartment in tangshan. there are 268 apartments, covering 130-190 square meters. it's supplied by guangzhou hedong electric company ltd. one period clothbound apartment have debugging recently and delivery the owner to live in.

## The Centro Smart House Control System in Tianjin

"the centro" smart house control system is developed from aolian real estate development ltd. in tianjin. aolian real estate development ltd. in tianjin as a branch of singapore combination group in china, inherits building features of singapore, develop and expand green concept by means of accumulating more than 20 years building experience of cities. it also forged exquisite apartment program "the centro" smart house control system, which is subject to the living concept of "alpha" together with the world famous building desire company rad.

there are 323 sets of small family apartment and 58 sets of big family apartment in "the centro" smart house. that program requires all desire must adopt advanced intelligent home control. many famous intelligent home enterprises, including hdl participate the program positively. through realistic home and compare from developers, they choose hdl as the intelligent home system eventually.

Through using main interface, you can understand real-time temperature and humidity and the air quality .and it can master control the electrical equipment by the zone control. It can also zone control the curtain, lights, electrical equipments by control wireless multipath control. ILIFE can make the curtain, TV, DVD, air-condition, background music, multimedia server realize scene control subject to the request of the user. Through timely monitoring safety situation by camera, one button can realize scene switch security monitoring.</p>

4 channel dry contact input module

SB-DRY-4Z	Basic parameters	Key feature
	<ul style="list-style-type: none"> <li>Power input: DC12-30V</li> <li>Bus power consumption: 20mA/DC24V</li> <li>Output signal: HDL-BUS signal</li> <li>operating temperature 0°C-45°C</li> <li>Work relative humidity 20%-90%</li> <li>Storage temperature -40°C-+55°C</li> <li>Storage relative humidity 10%-93%</li> <li>Boundary dimension: 49x31x12 (mm)</li> </ul>	<ul style="list-style-type: none"> <li>4 loop dry contact input</li> <li>Controlled target: scene, sequence, timer, universal switch, single loop regulation</li> <li>HDL-BUS interface</li> <li>Software internet ID code and equipment ID code setting</li> </ul>

1 channel current deductive infrared emission module

SB-IR-EM	Basic parameters	Key feature
	<ul style="list-style-type: none"> <li>Bus power consumption: DC12-30V</li> <li>Output signal: HDL-BUS signal: 12mA/DC24V</li> <li>operating temperature 0°C-45°C</li> <li>Work relative humidity 20%-90%</li> <li>Storage temperature -40°C-+55°C</li> <li>Storage relative humidity 10%-93%</li> <li>Boundary dimension: 49x31x12 (mm)</li> </ul>	<ul style="list-style-type: none"> <li>Bus interface: HDL-BUS</li> <li>Remote control code storage: 253 infrared code</li> <li>Launch carrier frequency: 38KHz</li> <li>Infrared remote control signal emission</li> <li>Detect accused of equipment working status</li> </ul>

Wall Mount IR Motion Sensor

SB-WMS-PIR	Basic parameters	Key feature
	<ul style="list-style-type: none"> <li>Power input: DC12-30V</li> <li>Bus power consumption: 15mA/DC24V</li> <li>operating temperature 0°C-45°C</li> <li>Work relative humidity 20%-90%</li> <li>Storage temperature -40°C-+55°C</li> <li>Storage relative humidity 10%-93%</li> <li>Installation: install in the wall</li> </ul>	<ul style="list-style-type: none"> <li>Detective zone: 12m</li> <li>Detective angle: 110 degree</li> <li>Bus interface: HDL-BUS</li> <li>Detective distance can be adjusted: software can be adjusted</li> <li>Boundary dimension (long x wide x high): 103.6x60.2x60 (mm)</li> </ul>

HDL-BUS system programming software  
MSM.V3

Product specification

HDL-Miracle building intelligent control system programming software is a kind of flexible and strong function desired tool, which can help to complete related setting of engineers.

iRidium home intelligent control software  
(iPhone版)  
iRidium home intelligent control software  
(iPad版)

Product specification

- Under the assist of the panel desire which has been set well, this product can help to control the intelligent bus system
- Allow user to create a beautiful interface which bring the animation
- Can upload graphical interface (GUI compile or .....), besides it can make the interface (IRPTP4) format and release it to the equipment of Windows XP/7, Windows Mobile/CE
- At the same time, it support two or multiple equipments or through using Ethernet/wireless internet, it can control a interactive equipment application.
